Welcome to the CREAM web

The CREAM (Computing Resource Execution And Management) Service is a simple, lightweight service for job management operation at the Computing Element (CE) level.

CREAM accepts job submission requests and other job management requests (e.g. job cancellation, job monitoring, etc).

CREAM can be used by Workload Management Systems (e.g. DIRAC), or by a generic client, e.g. an end-user willing to directly submit jobs to a CREAM CE. For the latter user case a command line interface (CLI) is available.

CREAM exposes a web service interface.

CREAM will be supported by INFN (in the context of the H2020 EOSC-Hub project) with bug fixes and security fixes until the end of 2020.

Please refer to the top menu or here to access the available documentation on CREAM

CREAM Web Utilities

- WebSearch - simple search
- WebSearchAdvanced - advanced search
- WebTopicList - all topics in alphabetical order
- WebChanges - recent topic changes in this web
- WebNotify - subscribe to an e-mail alert sent when topics change
- WebRss, WebAtom - RSS and ATOM news feeds of topic changes
- WebStatistics - listing popular topics and top contributors
- WebTopMenu - top menu definition
- WebPreferences - preferences of this web
