Jump Box.....	1
----------------------	----------

Jump Box

The Jump Box at the top or sidebar of each page is a hidden gem for quick navigation in a large TWiki.

1. **Quick Jump:** Enter a topic name to quickly jump to the topic, for example:

- WebNotify to jump to WebNotify in the current web
- Main.WebNotify to jump to WebNotify in the Main web
- Main. to jump to the home of the Main web
- BrandNewTopic to jump to a non existing topic in the current web, which is useful to create orphaned topics

2. **Quick Navigation:** Enter part of a topic name to get a list of similar topics, for example:

- faq to get TWikiFAQ, TWikiFaqTemplate, TextFormattingFAQ
- Main.users to jump to the Main web from any web, and get a list of topics about users (all in one step)

 **Tip:** Entering part of a topic name is a simple, yet powerful way to quickly navigate to content of interest, also in a large wiki.

Note: The Jump Box is not a search box
