# Edit tables with EditTablePlugin

The EditTablePlugin allows you to edit TWiki tables using edit fields and drop down boxes. Tables have an [ **Edit** ] button if preceded by an `%EDITTABLE{ ... }%` variable. Each column can be a text field, a drop down box, a date field, etc. Multiple tables per topic are editable, but only one at a time can be edited.

Example:

```
Syntax: %EDITTABLE{ format="| row, -1 | text, 20, init | select, 1, one,
two, three, four | radio, 3,:-),:-I,:-( | label, 0, %SERVERTIME{"$day
$mon $year $hour:$min"}% |" changerows="on" }%
```

| Nr | Text field  | Drop down | Mood | Timestamp         |
|----|-------------|-----------|------|-------------------|
| 1  | hello table | one       |      | 26 Jun 2002 12:30 |
| 2  |             | two       |      | 27 Jun 2002 12:40 |
